Problem Statement

CRED Engagement Challenge

CRED

The Core Issue

- CRED users open the app **once a month** to pay their credit card bill, collect rewards, and immediately leave.
- Although the app offers games, rewards, shopping, and financial tools, most users **never explore** them.
- This **low engagement** limits feature adoption, reduces retention, and restricts long-term value.

COMPANY OVERVIEW

ABOUT CRED

1. Fintech + lifestyle platform rewarding users for timely credit card payments
2. Founded 2018 by Kunal Shah, HQ Bengaluru
3. Gatekept to credit score **750+** — India's only invite-only fintech app
4. **~13M MAU** (2024), **12.6M** monthly transacting users in FY25 (+14.5% YoY)
5. Valuation: peaked at **\$6.4B** (2022) → reset to **\$3.5B** (2025) → in talks at **~\$4B** (2026)

COMPETITIVE LANDSCAPE

CRED stands out with the highest entry barrier, broadest ecosystem and a premium, trust-driven experience.

ASPECT	 CRED	  	 Slice 	 CheQ
 Target User	High-credit-score, affluent	Mass market (everyone)	Millennials, Gen Z	Urban credit-card users
 Entry Barrier	750+ credit score	None	Low (credit check)	None
 Bill Payment Rewards	Coins + premium offers (low real value)	Cashback (occasional)	Cashback / brand offers	Cashback (“chips”)
 Ecosystem	Broadest — Store, Travel, Lending, Mint	All-in-one payments site	Card-centric	Thin — bill pay + rewards
 User Experience	Premium • Cluttered • Glitchy UPI	Familiar Sticky Cluttered	Clean Rewarding	Easy No gate Low trust (2.4★)
 Engagement Hook (reason to return)	Brand trust — no recurring hook	Daily UPI need	Reward on every spend	Cashback + open access

USER RESEARCH

Feedback

- Rewards losing value
- CRED coins have limited use
- Interface feels cluttered
- Users value reminders and payments

KEY FINDINGS

01

LOW REWARD VALUE

Rewards and offers don't feel useful or worthwhile.

● High

02

FEATURE DISCOVERY

Users struggle to find key features; interface feels cluttered.

● High

03

LOW PRODUCT ADOPTION

Additional products rarely explored; CRED used mainly for bill payments.

● Medium

INSIGHTS

- Users open CRED primarily for bill payments and reminders.
- Rewards and offers are not relevant or valuable enough.
- CRED Coins lack strong use-cases, leading to low engagement.
- The interface feels cluttered with extra features.
- There is a need for better feature discoverability and simplified experience.

Aditya Kukreti

ACTIVE USER

“ I mainly use CRED for bill payments. If rewards offered real cashback and not just offers, I'd probably open the app more often. ”

AGE

25 – 30

OCCUPATION

Working Professional

INCOME

₹12 – 15 LPA

LOCATION

India

STATUS

Active User

BIO

Aditya uses CRED regularly for credit card bill payments and credit score tracking. He appreciates a clean financial experience but doesn't find enough value in CRED's ecosystem beyond its core payment utility.

MOTIVATIONS

Cashback & rewards

Track credit health

Quick & easy payments

GOALS

Pay bills securely

Monitor credit score

Get real value

Use one trusted platform

PAIN POINTS

Rewards don't feel valuable

Extra features don't solve immediate need

Heavy UI & shopping banners

Opens CRED mainly only during bill payment

LIFESTYLE

Busy professional

Manages few credit cards

Prefers simple apps

Values real cashback

Values security over gamification

Rishav Beniwal

“CRED is my bill payment app, but the rewards don't feel worth the effort.”

 **AGE** 20 – 24

 **OCCUPATION** MNC Corporate Employee

 **INCOME** ₹4 – 5 LPA

 **LOCATION** Pune, India

 **STATUS** Monthly Utility User

BIO

Rishav is a disciplined credit card user who relies on CRED primarily for bill reminders and UPI payments. While he values secure transactions, he rarely explores other CRED products because the rewards no longer justify the effort.

MOTIVATIONS

Bill payments

Useful rewards

Quick UPI payments

Secure transactions

GOALS

Never miss deadline

Tangible rewards

Pay in under 30 sec

One trusted app

PAIN POINTS

Rewards shifted from cashback to coupons; less valuable.

Garage and Mint features remain hard to discover.

App interface feels cluttered and confusing.

Repeated payment reminders even after bill is paid.

LIFESTYLE

Uses UPI at shops

Bill reminders & alerts

Uses 2 cards for all spends

Coins pile up

Trusts for payments

USER JOURNEY MAPPING

1 WhatsApp Reminder

Neutral

Reminder nudges me to take action on time.

2 Open CRED App

Slightly Positive

Heavy UI & shopping banners.

3 Select Bill

Focused

Clear bill details and payment options before confirming.

4 Make Payment

Happy

Ready to complete payment with clear summary.

PAIN POINTS

Multiple reminders can feel repetitive.

Heavy UI & shopping banners.

Payment options not clearly differentiated.

USER JOURNEY MAPPING

5 Payment Successful

Happy

Instant confirmation builds trust and assures the user.

6 Explore Rewards

Excited

Users look forward to rewards after completing the payment.

7 Play Reward Game

Curious / Engaged

Gamification makes the reward experience interactive and fun.

8 Reward Revealed

Slightly Disappointed

Rewards are often not very valuable or require high minimum spends.

PAIN POINTS

Reward value feels underwhelming.

Too many steps to claim rewards.

Rewards lack personalization.

High expectation, low delight.

SOLUTION 1

CRED One Card

One physical card. Works everywhere.
Automatically gives you the **best reward**.

SOLUTION HIGHLIGHTS

One Card for Every Spend

Use a single CRED One Card for all payments — metro, restaurants, fuel, groceries, retail & more.

Best Reward. Automatically.

CRED's backend automatically routes every transaction through the linked card that gives the maximum reward for that category.

One App. One Bill. Total Clarity.

All your spends, rewards, and bills are consolidated seamlessly in the CRED app.

Zero Extra Effort

No need to choose the right card.
Just tap, pay, and earn the best — automatically.

SOLUTION 2

CRED Lite

Instant UPI transaction.

SOLUTION HIGHLIGHTS

Simplified Mode

A simplified mode that strips the experience to two actions only: **Pay** and **Bill**.

Two Actions Only

On app open, user sees two options: **Pay** (UPI, Scan, Send Money) and **Bill** (view, pay credit card bill). Nothing else on screen.

Fastest Path

Fastest path from open to transaction in any UPI app.

Removes Distractions

Removes every obstacle between opening the app and completing that action.

NORTH STAR METRIC & L1 FRAMEWORK

NORTH STAR METRIC

Monthly Financially Engaged Users (MFEU)

MFEU counts users who open CRED at least once on a non-bill day AND complete at least one meaningful action in a given month such as payment, card spend, or insights.

This captures the shift from “bill payment utility” to “financial OS”.

L1 DRIVER METRICS

L1 METRIC		WHAT IT MEASURES
	Mid-month opens per user	How many times a member opens CRED on non-bill days in a month.
	Cross-feature rate	% of bill-payers who use at least one non-bill feature (Pay, card, insights) in a month.
	CRED UPI share	% of a member’s UPI transactions/amount that happen on CRED vs other UPI apps.
	Payments per week	Average number of payments a member makes via CRED (Pay or card) each week.

L2 metrics (activation CTR, feature conversion rate, trust score) explain why an L1 is moving, but do not directly move MFEU. Weekly insight open rate is an L0.5 operational health check, not a North Star input.
